SUMMARY

UI/UX Designer and Front-End Developer experienced in building and deploying responsive web interfaces. Skilled in Figma, HTML, CSS, and JavaScript, with a focus on usability and clean design systems. Actively developing real-world projects, including a 30-day JavaScript challenge and a deployed portfolio.

Work Experience

UI/UX Design Intern
Memolane (Neo Labs) | Apr 2026 – Present
- Designing UI and improving UX for a journaling-based product
- Creating wireframes and layouts using Figma
- Collaborating on design decisions and product experience

Education

B.Tech – Computer Science (AI & ML) **2023 – Present**
Lamrin Tech Skills University, Punjab

Intermediate (Science) **2023**
Patna Convent, Patna

Matriculation **2021**
St. Karen's Secondary School, Patna

Skills

UI/UX Design
Figma (Auto Layout, Components, Prototyping)
Wireframing, Design Systems

Frontend Development
HTML, CSS, JavaScript
DOM Manipulation, REST APIs
Responsive Layouts, UI Logic

Core
Problem Solving, Critical Thinking
Design Thinking, Communication
Team Collaboration

AI/ML & Robotics
Machine Learning (Basics), Data Handling, ROS2, PID Control, Gazebo Simulation

Tools
Figma, Framer, GitHub
Netlify, VS Code
Canva

Projects

Personal Portfolio Website (Design + Development)
Tech: Figma, HTML, CSS, JavaScript
Formspree, Netlify, GitHub Pages
- Designed and developed a responsive portfolio from scratch with clean, responsive UI and structured layout
- Implemented interactive components and functional contact form (Formspree)
- Deployed on Netlify and GitHub Pages with optimized structure

30 Days JavaScript Project Collection *(In Progress)*
Tech: HTML, CSS, JavaScript, GitHub Pages
- Building and deploying 30+ interactive projects using GitHub Pages
- Creating a centralized website to showcase all projects
- Strengthening DOM manipulation, API integration, and reusable UI components

OTHER PROJECTS
- **Dynamic Price Analyzer** (AI/ML – Team Lead) — ML-based price trend analysis
- **Drone Stabilization** (ROS2, Gazebo) — PID-based drone control system
- **Student Course Enrollment** (UI/UX) — user flow and dashboard design
- **Employee Leave Management** (UI/UX) — workflow-based system interface
- **Weather App UI** — real-time data-focused interface design
- **Drone Landing Page** — modern UI with strong visual hierarchy
- **Business Website UI** — structured layout with usability focus
- **UltraEdit Clone** — responsive layout recreation
- **Netflix Clone** — modern UI styling

Achievements

- Participant – E-Yantra Robotics Competition (IIT Bombay)
- Active participation in hackathons and team-based projects
